NAICS: 541618 · 541810 · 541512 · 541513 · 561110 · HQ: Pennsylvania / New Jersey service area · nationwide delivery

CORE COMPETENCIES

Community Engagement Services

Design and execution of engagement campaigns; event support; education and awareness; culturally responsive outreach across languages and communities.

Data Collection & Survey Administration

Native digital intake and outcome surveys deployed by link and QR; participant privacy by coded identifier; consent workflows built in.

Program Evaluation & Outcome Measurement

Outcome frameworks mapped to program goals; quantitative metrics and qualitative synthesis in one evaluation stream.

Progress Reporting & Impact Communication

Recurring engagement documentation reports; dashboards; funder- and board-ready deliverables exported from live data.

PAST PERFORMANCE

Publication production & print-ready delivery

Long-form document production for a community-serving nonprofit: manuscript through print-ready files, interior layout, cover formatting to print specification, built as a repeatable document-generation pipeline. Delivered to client specification, ready for distribution.

Program resource development & communications support

Public-facing resource materials and communications assets supporting a community-serving nonprofit's programming and community engagement, designed for the population served.

Platform delivery & impact-documentation infrastructure

Architected and delivered a secure engagement-and-impact documentation platform: coded participant references, organization-level data isolation at the database row level, and funder- and evaluator-ready reporting exported from live data.

Entries are de-identified. References available upon request.

DIFFERENTIATORS

Platform-delivered documentation

Evidence captured as the work happens, so progress reporting is continuous, auditable, and tied to source data.

Engineered not to inflate

Every figure is labeled as measured or estimated. Evaluators see honest numbers because the architecture does not allow anything else.

Privacy and security by design

Participants referenced by code, never by name. Row-level data isolation. U.S.-operated delivery; no offshore access to client or participant data.

Small, senior, accountable

SDVOSB prime or subcontractor. Direct access to leadership on every engagement.
